A note about Raisi's death

Raisi, the president of Islamic Republic of Iran found dead in a helicopter crash in north Iran

Azar Majedi

20 May 2024

The death of president of Iran, Raisi, the executioner of the 80s, one of the biggest criminals in human history, in a plane crash, caused a lot of joy. The relatives of the victims of the 80s smiled with relief that this killer has finally died.

The problem here is that happiness and excitement can end quickly. This death can be a precursor to a much wider and more deadly killing and destruction. This death does not appear to be accidental. It was intentional. The question is, whose job is it? Israel and America? Internal purification? Both are possible, although the first possibility seems more likely. The official Israeli denial immediately creates suspicion.

But each of the two cases is rooted in the conditions of the region and the increased risk of war. The expansion of the war in the region will kill millions more people. It will destroy what is left of civilisation. People of Iran will be seriously harmed by the expansion of the war. Just think of Afghanistan, Iraq, Libya, Syria, Palestine, Sudan, Somalia, Congo, etc. The expansion of the war and the military attack on Iran will place Iran among the list of the cursed.

We freedom-loving, egalitarian, socialist and communist people must protest against the spread of war firmly and steadfastly. The overthrow of the Islamic Republic should be done by the people themselves and by relying on the people's revolution. The overthrow of the regime as a result of the Israeli and American bombs is a repetition of the disaster of the destruction of Gaddafi in Libya.

Why Tribune?

The brutal genocide committed by Israel and its western allies, led by United States in Gaza has increased the risk of war and destruction in the region. The possibility of a military attack on Iran is of concern. These factors and the different viewpoints of the Left, labour and communist movements in viewing these huge historical events, led us to publish the "Tribune" magazine. We rely on the theoretical achievements of the labour communism movement of Mansour Hekmat, to offer an active theoretical intervention in the course of the world's dangerous situation and Iran's sensitive situation by presenting communist analysis and solutions.

The expansion of the student protest movement, the ideological-political crisis of America

The horizon of expansion of war and destruction

Azar Majedi

The world is on the edge of the abyss. For more than seven months, Israel has been carrying out an open genocide in front of the eyes of humanity with the full support and complicity of America and Western governments. The world is in turmoil. The killers do not care. US imperialism beats the war drum. Despite the million-strong protest movement around the world and in America itself, America is not going to stop.

The student protest movement is an important turning point in the political situation of America and the West. Universities have practically turned into battlefields. This movement has spread to other countries including Canada, Australia, United Kingdom, France, Spain, Germany and Italy. Despite the brutal police crackdown, the extent of the protests are expanding. These conditions are reminiscent of the movement against the Vietnam War and the political conditions of the late 60s and early 70s. The civil rights movement to eliminate discrimination against blacks, the women's rights movement and what became known as the May 1968 revolution in France. A period of excitement and transformation that has been recorded in history.

Political-ideological crisis

The American government is facing a deep political-ideological crisis. its reputation has fallen greatly. Distrust of the government is widespread. Public discontent runs deep. But the problem here is that this crisis is not only internal. It is international. Since World War II, America is the strongest world power. The number of coups, regime changes, wars and genocides that America has organised in the last 80 years in the whole world, from Latin America to Asia, Africa and the Middle East, is at a record high. But the problem here is that only force, money and military power are not enough to impose and consolidate power, an ideological-political narrative is also needed

to justify the presence of this force and its existential necessity.

After World War II, the West organised the Cold War. It defined a bipolar world, Western civilisation versus the Soviet Union and the Eastern Bloc, which ruled under the name of socialism. The world was practically divided into two poles; Soviet Union was introduced as a totalitarian pole, an enemy of freedom, democracy and human rights. "Western civilizations" as the banner of freedom, democracy and human rights. A large part of the world accepted this narrative or surrendered to it. America and the West won the war against the Eastern Bloc. After the fall of the Soviet Union, America needed a new narrative for sustaining its super power. The attack on Iraq was the prelude to the beginning of a new narrative. Following the attack on Iraq a new narrative was created: "war of the civilisation". This time, Islam and the Islamic movement were declared the great and evil enemy. It was declared that the West needs to defeat Islam in order to be victorious.

Funny how they made a giant out of nothing. Islam was present as a political movement in the Middle East, but it was not strong. It, in fact, owed that degree of existence which it had, to Britain and Western imperialism. In Iran, for example, the entire religious institution and all the clergymen, were made by Britain. The latter declared the Islamic movement against the pro-democracy, leftist and communist movement. It did the same in other countries too. Middle East has had a very important place in the colonial and imperialist policies of the West because of its oil and geopolitics. Britain has practically divided the Middle East and left it in the hands of different ruling families. 80 years ago, it planted the seeds of destruction, chaos and constant war in the region with the establishment of the state of Israel.

For thirty years now, "Western civilization" has apparently been fighting "Islamic terrorism"; this is the western narrative. We called it the war of two terrorist poles. State terrorism versus Islamic terrorism. The issue is that it didn't take long for the facts to leak out. It was revealed that all this Islamic terrorist power was created by the West itself, especially America and Israel. They threw a fake giant into people's lives, under the pretext of its destruction, they destroyed society and civilization and killed millions of people and displaced millions more. In twenty years, the Middle East has turned into a ruin.

The real movement that was able to gain power in the region after the fall of the Soviet Union was Arab nationalism. Anti-colonial nationalism was the most important social-political movement of the 20th century. The leftist tendency of this movement was with the Soviet Union during the Cold War. Arab nationalism was active and present during the Cold

War. It is a lesson to all those who dream of "independence" and Arab or African nationalism.

America has practically succeeded in completely subjugating the entire region. An important part of the region is destroyed and devoid of civilization. The occupation of Gaza project is nearing its end. The governments of the region are all puppets in the full sense of the word. 7 months of genocide in Gaza exposed all the facts in front of the eyes of the world. It is said that in Egypt and Jordan, mass discontent against the ruling governments is very widespread. Watching the complete complicity of the governments in the Israeli genocide has made the people of the region even more angry and at the point of explosion.

It seems that America and the West have won the war on the military front. But the problem is that the bombs did not destroy only Gaza, the whole edifice of the war of civilizations, the great civilization of the

Demonstration in London against Genocide in support of Palestinians

War. In addition, the Palestinian issue had become a festering wound that kept Arab nationalism and the spirit of protest and resistance alive in the region. The first intifada was leftist and secular. As a result of the intifada, Israel sought to create an Islamic organization to create division in the movement for the right to self-determination of Palestine. Hamas is the product of this black scenario. Saddam became very popular after the invasion of Kuwait. King Hussein of Jordan sided with Saddam Hussein against America. Of course, he was quickly banished. All these manifestations of rebellion against Western imperialism quickly turned into ashes and disappeared. The Islamic movement was an effective weapon against any anti-imperialist and anti-Western movement. The destruction of Libya and Syria, in particular, is supposed to be a good

lesson to all those who dream of "independence" and Arab or African nationalism. West against the backward Islamic terrorism, has also been destroyed. The facts have been revealed. Masks are torn. This narrative no longer works. The world no longer accepts it. The world is screaming. No one accepts the narrative of Western civilization against Islamic terrorism. Mainstream media and government officials are still repeating the narrative like parrots, but they don't have takers anymore.

America and NATO call themselves "law-based world"! This phrase has become a joke. But the West needs to repeat this clichéd phrase, because it cannot rule the world based only on bombs and weapons. It needs an ideological narrative. For two years, they have been trying to bring Russia to the same position as the former Soviet Union, and they are waging war

against it, making enemies of China. They are building another bipolar; They organize a new "hot cold war". This narrative is so baseless and fake that a significant part of the society recognizes it. If at the beginning of the war in Ukraine, in the anti-Russian-anti-Putin atmosphere that was created and popularized especially after the 2016 elections in America, as well as the feeling of sympathy with the Ukrainian people, NATO was able to attract the sympathy of the society and rule a war atmosphere over the society, but following the disclosure of financial scandals, the participation of the fascist movement in the government and army of Ukraine, the sabotage of efforts for peace by the West, the war provocation of the West, and the propaganda and hypocrisy of the government, this atmosphere has changed greatly. Especially following Israel's genocide in Gaza and the

the current situation in America and to a large extent in other western countries. People have completely lost their trust in the government.

The deep crisis that has engulfed the society in the last few years due to Covid, the stringent control that ruled the society during the period of Covid, the high number of injuries and deaths caused by the vaccine and the severe censorship of the mainstream media and even social media is actually based on the trust and credibility of the government which has taken a serious blow. The wide spread of poverty, homelessness, the complete collapse of the social welfare system, the unquestioning support for the war in Ukraine and the Israeli genocide in Gaza, and the astronomical costs for the continuation of the war have intensified people's anger. And the government's only response to this

Students' encampment in LA, USA attacked by police

complete complicity of the West in this crime, people's eyes have been opened.

Society has woken up. Social media is full of confessions, especially from the younger generation who declare that their eyes have been opened. The veil of lies has been torn. Now people know the truth and are angry. They know that they have been lied to all their lives. Now they understand the role of Israel in the geopolitics of the region. The governing class has been discredited. Any trust has been taken away from it. This is a very serious and deep crisis.

In dictatorial countries, the government does not rely on winning the trust of the people, but on force of the head of the spear. This is a common truth. But in democracy, both should be used. When the second weapon, the force of the bayonet, becomes practically the ruler, the government is in a serious crisis. This is

anger and rebellion is violent repression. If this situation does not change, it is the next step towards fascism.

It does not seem that the Western governments intend to retreat. The issue is that in this critical situation, retreat has a wider meaning. They are furiously moving towards the suppression of any kind of freedom and civil rights. The situation today is different from the period of the Vietnam War. The protest movement at that time played a decisive role in ending of the war and some short-term retreats of the government. But today it seems that the ruling class is not able to retreat. This is why it has defended the genocide with such intensity and brazenness for the past seven months and is still doing so.

One should ask what is the reason for this stubborn defence of Israel and the killings in Gaza, despite this

global anger of millions? The goal is to completely carry out an ethnic cleansing in Gaza to maintain a war situation and develop the war. It seems that the crisis of the system is so deep that war is the only answer. The efforts of the West to expand the war in Ukraine are quite obvious. French President Macron talks about the seriousness of the situation and the need for NATO to intervene in the war. He announced that France is ready to deploy troops. British Foreign Secretary David Cameron has given Ukraine the green light to launch a missile attack on Moscow. In March, a terrorist attack was carried out in Moscow, for which ISIS claimed responsibility. Russia announced that it was the work of Ukraine and probably the West was involved in it. The matter remains silent for now. But everyone knows that ISIS is the handiwork of America and Israel. It is fighting in Syria alongside America

not successful. France attempted a coup, but failed. Al-Qaeda is now carrying out a sabotage and war-mongering mission in Burkina Faso. Russia is said to be present in Niger and Burkina Faso and training the military. There is also talk about the presence of the Islamic regime. The reason for Macron's insistence and emphasis on sending troops to Ukraine and war with Russia becomes clear.*

The anti-colonialist discourse has become very hot in Africa and the South African government has become a flag bearer of this movement. It seems that the African National Congress (ANC) is trying to restore lost credibility. A significant part of Africa is in the midst of a war on terrorism. Islamic terrorist forces have taken over the region, especially in West Africa. Millions of people are displaced in Niger, Sudan and Somalia.

Gaza

and Israel. How is it that in the last seven months, the only terrorist operation that this Islamic movement has carried out was in Russia?

It is very clear that NATO is inciting Russia to attack in various ways. Western forces are actually fighting in Ukraine. Without Western weapons, Ukraine cannot fight for a day. Weapons prohibited by international law, including depleted uranium, have been placed in Ukraine's possession. So far, Russia has not responded to these provocations.

Geopolitical change

Once again, the war has begun to determine who rules the world. The war in Ukraine is one battlefield, the clearance of Gaza is another. The anti-colonial nationalist movement in Africa is coming to life. Four former French colonies in Africa, Mali, Niger, Burkina Faso and Guinea, have staged coups against France. Attempts were made by neighbouring countries, especially Nigeria, to counter the coup, which were

Some analysts talk about the danger of a large-scale war in Africa. The anti-French-anti-colonialist coups in West Africa have terrified the West. These countries are the source of precious metals. Child slavery in cobalt resources in Congo is a shame of humanity.

BRICS, the economic-political organisation competing with the West, is gaining strength. BRICS is a major economic power that is becoming an important political weight. China, Russia, Brazil, India and South Africa are the initial members of BRICS, which will soon increase to 24 countries. The Islamic Republic has been accepted as a member of BRICS. BRICS has succeeded in removing the dollar from many transactions. Trading in domestic currencies is becoming a common policy. This is a big blow to America's position.

Considering the provocation of the war in Ukraine, that is, the expansion of NATO after the fall of the Soviet Union, an issue that has been clearly proposed and

emphasised not only by the Russian government in various world or European conferences and summits, but also by many Western politicians and analysts have done reiterated that NATO is still expanding. Practically all European countries neighbouring Russia have joined NATO, except for Ukraine. Finland and Sweden and Baltic countries joined NATO. This is a clear provocation of war against Russia, especially since Putin's request to join NATO was rejected several years ago. In the atmosphere of hostile propaganda against Russia, full financial and military support of Ukraine to continue the war, sending illegal weapons to Ukraine, NATO keeps getting closer to Russia's borders. By any kind of logic, this move and policy can only be interpreted as incitement to war.

War-mongering against China, interference in Taiwan to provoke war, in a situation where the United States recognised Taiwan as a part of China during Nixon's time, and Taiwan is considered a part of China from the point of view of the United Nations. The rising tension between the Philippines and China, while the US has expanded its military position in the Philippines in the last two years, and the rising tension in the region between Japan, South Korea, the Philippines and China is very worrying. It seems unlikely that this level of warmongering, fanning the flames of war will stop here. If so far the fire of war has not become hotter, it is because of the lack of sharp reaction of Russia and China to the provocations of America and NATO**.

Islamic Republic

The position of the Islamic Republic in the region and in the world is special. The Islamic Republic, like all organisations and the entire Islamic movement, is the handiwork of America and the West. A product of the Carter and Brzezinski Green Belt Project. In order to defeat the left and communism in Iran, the main forces of the revolution in the country, the Islamic Republic had to take an anti-imperialist stance. A gesture that led to its political success in the region and among some forces known to the Iranian left such as the Tudeh Party and the Majority Party. During these 45 years, the relationship between the Islamic regime and the United States has mostly been a sham quarrel. They have played hand in hand. Behind the scenes they have traded, in front of the stage making a fuss. But now it seems that the political difference has become more serious. Last year, with the formation of a broad mass and revolutionary movement, the United States first seriously ordered the regime change project, but after

a while, they kept this plan silent and started negotiations. Now, in terms of positions in the region, the Islamic regime, along with its ally Hezbollah in Yemen, has become a significant power.

Israel insists on expanding the war with Iran. (There are many speeches and interviews of Netanyahu, even in the US Congress, that talk about the necessity of a military attack on Iran.) Attempts are made to attribute the desire to expand the war to the policies of Netanyahu and the right-wing government of Israel. But Netanyahu is not able to make any decisions alone. It is possible that now there are differences on how to proceed with this war and killings, within the ruling class of the West, but in the final analysis, Israel does not make any mistakes without the approval and support of the United States.

The situation in the region is very sensitive and dangerous. A military attack on Iran will cause a huge destruction, bigger than Iraq. Iran's right-wing opposition beats the war drum. It stands firmly and brazenly behind Israel and demands Israel and America to attack Iran. If anyone has ever had doubts about the nature of this criminal fascist current, they will know the nature of this current with this dirty propaganda. On the other hand, a significant part of the leftist and labour movement in Iran seems to have swallowed the

narrative of Israel's war with Hamas and the Islamic movement, and therefore has mostly adopted a policy of silence in the face of these tragedies.

Contrary to the ruling opinion among some of the leftist forces, the Islamic Republic does not want war. The Islamic Republic needs tension, but does not want war. War will lead to its destruction. Inciting war for the Islamic Republic is like suicide. For this reason, it negotiated with America for two weeks before attacking Israel. It informed the place and time of the attack. Iran's attack on Israel was a show of war, like a manoeuvre. The mainstream media and Western governments and

Iran's right and left opposition mocked the Islamic regime for failing to cause serious damage and destruction. An irresponsible move. Ridiculing of the Islamic regime for not inflicting serious injuries is actually a provocation for war. The people of Iran will not benefit from the war. Death and destruction is the only result of Israel and the West's military attack on Iran. We must learn from history. We should not look too far.

Analysts and journalists opposing America and Israel mentioned the Islamic regime's military move as an

Palestinians in Gaza thanking students

important show of power. Here is the show in its true sense. This was not a military attack, but a military exercise. The problem is that the Islamic Republic implemented a calculated plan for a military show and not a real war. And it has not yet responded to Israel's second attack. Russia threatened Israel that if it attacks Iran, Russia will intervene.

It seems that America and the West, a phenomenon that the West itself calls "Rules based Order", are in a serious political, ideological and economic crisis. The danger of the third world war is increasing day by day. ** The massive movement of millions against the genocide in Gaza, the general and global awakening of the people, the revolt and protest of millions of people have caused problems and interruptions in the ruling class's plans. It remains to be seen which one will win: people and justice or war, killing and destruction?

Therefore, it is very vital that the freedom loving, egalitarian, labour, left, and communist forces, strongly and consistently, unite their forces not only to stand against this destructive dark plan of the Western governments, led by America, but also to form a front for freedom and socialism against the nationalist, "anti-imperialist" and pro-BRICS movements. The killings in Gaza and the cleansing of Gaza are part of this dark scenario. Expansion of war, attack on Iran, World War III are possibilities. This risk should be taken seriously. It is impossible to deal with the importance and dangers of the events by just saying "God willing, it's nothing!"

Silence towards Israel, America and the West for fear of gaining power of the Islamic regime or the Islamic movement is an inverted concern. The only way to deal with the Islamic movement is the strong alignment of the left and communism in defence of justice, freedom, humanity, equality and peace. The silence of the left strengthens the Islamists. It leaves the battlefield empty. The field is handed over to the Islamists. Political boycott in this situation is a pacifist and dangerous policy. They say that Hamas has become stronger and more popular. Before the war, Palestinian people were tired and furious with both the corrupt and thieving forces that are supposed to represent them, i.e Hamas and Fatah. They have not had much support. During these seven months of war, Hamas has become more popular with the propaganda of Israel and the West to describe this war as a war between Israel and Hamas. They have actually promoted it to the position of resistance leader. When the field is empty, whoever is on the field becomes the main force.

The rebellious and desperate people of Gaza who are massacred, or are covered in blood and killed by bombs, tanks and bullets, or fall to the ground due to thirst and hunger, need hope. This is human nature. They will hang on to anything to save themselves. The need for liberation, the need to confront, the need to resist, even sometimes the need for revenge drives people as an instinct. In this situation, the forces that are present in the scene and fight alongside the people, have the possibility to be promoted to the position of

leader. Reaction also knows and understands this need. This is how the reactionary and corrupt movement of Hamas is elevated to the position of resistance leader.

The situation is serious. one must think seriously. A strong libertarian, egalitarian, humanitarian, left and socialist force should be organized. one has to face this world. One has to confront the criminal, reactionary and repressive forces in both poles. Once again, it is confirmed that socialism is the only way to save humanity. As long as capital, money, profit and greed rules the world, death and destruction are inevitable. As long as capitalism rules, war, destruction, Genocide and massacre, oppression and discrimination are inevitable.

Notes

* France has 14 (former) colonies in Africa. These colonies pay \$500 billion in "colonial taxes" to France. A part of the budget of these countries goes to French banks under various headings. Thus, France is able to take about 85% of the annual income of these countries.

** British Prime Minister Rishi Sunak recently pointed out very clearly the danger of even nuclear war in the near future at the "Policy Exchange" conference. In this speech, he points out the deadly dangers facing Britain and the West in the next 5 years.

"It is said that history is written by the victors. It must be added, however, that history, which is written by the defeated is ever more false and venomous, since this latter is nothing but the former dressed in mourning, surrender and self-deceit. If history is the story of change, then real history is the history of the undefeated – the history of the movement and people who still want and are struggling for change, the history of those who are not willing to bury their ideals and hopes of a human society, the history of people and movements that are not at liberty of choosing their principles and aims and have no choice but to strive for improvements."

Mansour Hekmat

The history of the undefeated (1995)

Mansour Hekmat
www.m-hekmat.org

On 25 March 2024 a conference was organised by women's rights activists to condemn the atrocities committed by Israel, and in support of the Palestinians. Activists from Middle East and Europe took part.

"The Campaign of Women's Rights Movement Against Genocide -For Palestine" was formed.

Statement by the conference

Genocide in Gaza, where does the women rights movement stand?

We express our deepest concern for the plight of more than 2 million people in Gaza, who are at the verge of starvation and more slaughter at the hands of Israel and with complete support of the US and the Western ruling class.

We strongly condemn the genocide that has been taking place in Gaza for nearly 6 months, resulting in 32000 deaths including 13000 children, many injured and disappeared. For the first time in history, this mass-slaughter has been well-documented, ironically by the victims of the genocide.

We demand an immediate and permanent ceasefire, immediate humanitarian aid, the return of the displaced and rebuilding of the destroyed communities.

We stand with the people of Palestine. We call on all progressive, freedom-seeking and egalitarian movements and organisations in the world, particularly workers' and women's rights organisations, to take a strong position on the side of justice and humanity; on the side of people of Palestine. This is a historic moment, when our words and actions matter. In the real world, keeping silence will mean standing with the aggressor, with the murderer, with the oppressor.

We live in a dire situation. Civil rights are under vicious attack by the governments; censorship of the opposing voice, silencing the dissent and banning protests are becoming commonplace in the West. Defending Justice in a broader sense of the term becomes a social and moral responsibility of all decent human beings.

We call on the world to fight for justice for the people of Palestine. The solution of the Palestinian question is the most pressing issue of our time.

Israel and the West must be condemned for their brutality, cruelty, propaganda and lies. The world has seen through the mask of lies and deception.

Conference

“Genocide in Gaza, where does the women's rights movement stand?”

The speech of Homa Arjomand, coordinator of the international campaign of a single secular education system-Canada, at the conference

March 25, 2024

I will start my speech by welcoming the speakers and participants in the conference and emphasising what goals we are pursuing from this conference.

What is the subject of my speech is the invasion of the Western governments, the supporter of the racist government of Israel, on political and civil liberties in the countries under their rule and their efforts to silence the protests against the genocide of the people of Gaza. Many predicted from the very beginning that the Israeli army's brutal invasion of Gaza, racism, suppression of freedoms, censorship and anti-immigration would grow. Instability will spread and the crisis will deepen, and the possibility of war in the region will increase.

On the other hand, we are witnessing an unprecedented international justice-seeking and humanitarian mass movement in support of the Palestinian people and against the genocide committed by the Israeli government. This movement has terrified the politicians and leaders of the Western countries. They didn't expect such a global unity and solidarity to be formed considering the extensive propaganda that they spread in support of Israel and its military aggression. They realised that the war propaganda was very effective, so they made it their mission to limit political freedoms. They deployed police brutality against demonstrators. They declared that these demonstrations were anti-Semitic, and passed various laws to give their anti-"democratic" actions a legal aspect. By adding a clause related to "Zionism" to the anti-Judaism bill of the year 2016 any kind of criticism of Zionism was also recognised as a crime.

Another case is the government directives that were initially issued in the United States and were gradually followed by the Western powers without question, which declared that any government employee who posts anything against Israel on social media will be fired. Even supporting the Palestinian people will face this punishment. If this person is the head of an organization or agency or a member of the board of directors of a charitable organization, the entire financing of that organization will be stopped.

Journalism and broadcasting of news in network media are now also blocked on Facebook and Instagram. In the past few weeks, many people in Canada have been searched,

suspended and fired by their employers for posting or expressing views that advocated justice for the Palestinians.

Law students are now facing expulsion from the university for signing a petition condemning Israel's massacre. Journalists who publish an article about the situation of the Palestinian people on social networks without prior approval from the newspaper director will be fired from their positions.

Currently, school board members and elected representatives of the people in education have been interrogated by an "impartial" institution, and the social media is investigating them as a crime. There have been cases where pilots have been banned from working as pilots due to liking or sharing some posts in support of the people of Gaza on social media. They don't even show mercy to their parliamentarians, and they banned a representative who spoke against the genocide from participating in parliament and general assembly meetings.

Writers, artists, readers and programmers of blogs or sites should also be added to this list. In order to create fear and terror among protesting people, they did not even wait for the bills to become law. They opened the hands of extremist and fascist groups and currents for an open and violent attack on the demonstrators. The world is witnessing the increase in crimes caused by the hatred of this group of extremists.

In Germany, we are witnessing an open attack on immigrants and refugees. You must know about the alternative plan "Fur Deutschland" leaked by the extreme right wing party. This plan was based on the idea of deporting all citizens of non-German origin. Of course, it was met with demonstrations of several hundred thousand people. They came up short. There is not a day that spreading lies, falsification of facts, and blackmailing of government spokesmen and media, or under the control of the Israeli government, does not become an alternative through social platforms and media.

We live in a critical historical moment. An important duty is weighing on our shoulders, and that is the defence of humanity and justice, and this specifically means the defence of the Palestinian people and their equal rights to freedom and human life.

Student encampment against Israel, in support of Palestine

The mass protest movement against genocide committed by Israel, and the support of Palestinians in Gaza has taken a global dimension. Students in most countries have staged encampments to show their protest and anger towards universities' involvement and investment in Israel. Freedom-loving People are demanding condemnation of Israel, prosecution of Israeli leaders as war criminals, immediate ceasefire and recognition of Palestine. The following is the message of the **"The Campaign of Women's Rights Movement Against Genocide -For Palestine"** to the students' encampment at Toronto University, Canada. Students carried banners and chanted:

- Free, Free, Palestine,
- Stop genocide in Gaza now,
- We will not stop, we will not rest, disclose divests
- You think an encampment is more offensive than a genocide?
- We won't leave until university divests
- We are the students, we won't be silenced
- Jews for free Palestine
- Our Tuition funds Genocide
- Silence is violence
- Start divesting now
- University has blood in its hands

Letter of support to Columbia University students

May 1st/2024

Gratitude letter to students of Columbia University!
We at the Campaign of Women's Rights Movement Against Genocide -For Palestine, owe you brave students at Columbia University our gratitude for opposing the genocide in Gaza by your encampment. Your actions and demand for the immediate ceasefire, university divestment from

Israel, transparency about the university's investments and amnesty from any disciplinary measures for the protesting students are applauded. We praise you for being at the forefront of the global movement against the apartheid regime of Israel. You opened a new arena against the racist government of Israel and its allies, led by the USA. We admire your bravery and dedication for the value of justice. We proudly must emphasize that your leadership inspired the students of 90 other universities not only in the US but also in Europe. Your call for justice and end to genocide has reached to every household not only in the West but also to every corner of the world; and that is despite of false and fake news that all mainstream media and network media have fed the public. Your great revolutionary move exposed all the rotten democracy of the US government and has sent shockwaves through the ruling class. We want you to know we stand with you and will ask all freedom and justice loving people around the world to join this progressive movement that you are leading to end the genocide of the people of Gaza.

Comradely,

The Campaign of Women's Rights Movement Against Genocide -For Palestine
